the storage unit.

Application No. 09/773,581

and a series of vertically spaced-apart holes defined in said upright panels for allowing said rail engaging member to be mounted at selected vertically spaced-apart fixed locations along said at least two spaced-apart upright panels.

A storage organizer system comprising a rail adapted to be fixed to a vertical surface, a storage organizer unit for supporting some articles, a rail engaging member mounted to said storage organizer unit and projecting rearwardly therefrom for hanging said storage organizer unit from said rail, and a spacer extending rearwardly from a lower end portion of said storage organizer unit at a distance from said rail engaging member for defining a gap (D) behind said storage organizer unit once installed on said rail, wherein a series of vertically spaced-apart holes are defined in said storage organizer unit to provide for selective positioning of said engaging member relative to said storage organizer unit.

A storage organizer system comprising a rail adapted to be securely mounted to a substantially flat vertical surface, a storage unit including at least two laterally spaced-apart upright panels having front and rear portions, and at least one rail engaging member mounted to the two laterally spaced-apart upright panels and extending towards the rear, said rail engaging member being adapted to engage the rail for suspending the unit from the rail, wherein said rail engaging member includes a transversal member extending across said at least two laterally spaced-apart upright panels, and at least one hook mounted to said transversal member between said at least two laterally spaced-apart upright panels for engagement with said rail, and wherein a series of vertically spaced-apart holes are defined in said upright panels for allowing said transversal member to be mounted at various heights in
